Contents

VOLUME 13 NUMBER 1

MicroReviews

1 **Mechanism of action of tetanus and botulinum neurotoxins**
C. Montecucco & G. Schiavo

9 **DNA repair in the extremely radioresistant bacterium *Deinococcus radiodurans***
K. W. Minton

17 **When replication forks stop**
H. Bierne & B. Michel

Research Articles

25 **A novel gene whose expression is regulated by the response-regulator, SphR, in response to phosphate limitation in *Synechococcus* species PCC7942**
H. Aiba & T. Mizuno

35 **Characterization of broadly pleiotropic phenotypes caused by an *hfq* insertion mutation in *Escherichia coli* K-12**
H.-C. T. Tsui, H.-C. E. Leung & M. E. Winkler

51 ***Rhizobium meliloti* DctD, a σ^{54}-dependent transcriptional activator, may be negatively controlled by a subdomain in the *C*-terminal end of its two-component receiver module**
B. Gu, J. H. Lee, T. R. Hoover, D. Scholl & B. T. Nixon

67 **Bacteriophage-like particle of *Rochalimaea henselae***
B. Anderson, C. Goldsmith, A. Johnson, I. Padmalayam & B. Baumstark

75 **A conserved DNA sequence is required for efficient gonococcal pilin antigenic variation**
L. A. Wainwright, K. H. Pritchard & H. S. Seifert

89 **A non-directed, hydroxylamine-generated suppressor mutation in the P3 pairing region of the bacteriophage T4 *td* intron partially restores self-splicing capability**
M. D. Brown, K. L. DeYoung & D. H. Hall

97 **Structural and functional analysis of the promoter region involved in full expression of the *cryIIIA* toxin gene of *Bacillus thuringiensis***
H. Agaisse & D. Lereclus

109 **Cloning and sequencing of *Vibrio cholerae* mannose-sensitive haemagglutinin pilin gene: localization of *mshA* within a cluster of type 4 pilin genes**
G. Jonson, M. Lebens & J. Holmgren

119 **The HAP2,3,4 transcriptional activator is required for derepression of the yeast citrate synthase gene, *CIT1***
M. Rosenkrantz, C. S. Kell, E. A. Pennell & L. J. Devenish

133 **Role of *hns* in the virulence phenotype of pathogenic salmonellae**
J. A. Harrison, D. Pickard, C. F. Higgins, A. Khan, S. N. Chatfield, T. Ali, C. J. Dorman, C. E. Hormaeche & G. Dougan

141 **The virulence regulator protein of *Listeria ivanovii* is highly homologous to PrfA from *Listeria monocytogenes* and both belong to the Crp–Fnr family of transcription regulators**
R. Lampidis, R. Gross, Z. Sokolovic, W. Goebel & J. Kreft

153 **The human gastric pathogen *Helicobacter pylori* has a gene encoding an enzyme first classified as a mucinase in *Vibrio cholerae***
A. W. Smith, B. Chahal & G. L. French

161 **A small (2.4 Mb) *Bacillus cereus* chromosome corresponds to a conserved region of a larger (5.3 Mb) *Bacillus cereus* chromosome**
C. R. Carlson & A.-B. Kolstø

171 **Nod factors of *Rhizobium* are a key to the legume door**
B. Relić, X. Perret, M. T. Estrada-García, J. Kopcinska, W. Golinowski, H. B. Krishnan, S. G. Pueppke & W. J. Broughton

VOLUME 13 NUMBER 2

MicroReview

179 **The energetics of bacterial growth: a reassessment**
O. M. Neijssel & M. J. Teixeira de Mattos

Research Articles

183 **The terminal oxidases of *Paracoccus denitrificans***
J.-W. L. de Gier, M. Lübben, W. N. M. Reijnders, C. A. Tipker, D.-J. Slotboom, R. J. M. van Spanning, A. H. Stouthamer & J. van der Oost

197 **Membrane association and role in DNA uptake of the *Bacillus subtilis* PriA analogue ComF1**
J. A. Londoño-Vallejo & D. Dubnau

207 **Variable expression of the Opc outer membrane protein in *Neisseria meningitidis* is caused by size variation of a promoter containing poly-cytidine**
J. Sarkari, N. Pandit, E. R. Moxon & M. Achtman

219 **A novel, small endoglucanase gene, *egl5*, from *Trichoderma reesei* isolated by expression in yeast**
A. Saloheimo, B. Henrissat, A.-M. Hoffrén, O. Teleman & M. Penttilä

229 **Separate pathways for excision and processing of 16S and 23S rRNA from the primary rRNA operon transcript from the hyperthermophilic archaebacterium *Sulfolobus acidocaldarius*: similarities to eukaryotic rRNA processing**
P. Durovic & P. P. Dennis

243 **Cloning and molecular characterization of a *Legionella pneumophila* gene induced by intracellular infection and by various *in vitro* stress conditions**
Y. Abu Kwaik & N. C. Engleberg

253 **The pesticin receptor of *Yersinia enterocolitica*: a novel virulence factor with dual function**
A. Rakin, E. Saken, D. Harmsen & J. Heesemann

265 **The *dps* promoter is activated by OxyR during growth and by IHF and σ^S in stationary phase**
S. Altuvia, M. Almirón, G. Huisman, R. Kolter & G. Storz

273 **Multiple signalling systems controlling expression of luminescence in *Vibrio harveyi*: sequence and function of genes encoding a second sensory pathway**
B. L. Bassler, M. Wright & M. R. Silverman

287 **Activation of a *vmp* pseudogene in *Borrelia hermsii*: an alternate mechanism of antigenic variation during relapsing fever**
B. I. Restrepo, C. J. Carter & A. G. Barbour

301 **Cloning, sequencing, and characterization of multicopy suppressors of a *mukB* mutation in *Escherichia coli***
K. Yamanaka, T. Mitani, T. Ogura, H. Niki & S. Hiraga

313 ***traJ* sense RNA initiates at two different promoters in R100-1 and forms two stable hybrids with antisense *finP* RNA**
W. B. Dempsey

327 **The purified SoxABCD quinol oxidase complex of *Sulfolobus acidocaldarius* contains a novel haem**
M. Lübben, A. Warne, S. P. J. Albracht & M. Saraste

337 **Identification and characterization of hitherto unknown *Mycoplasma pneumoniae* proteins**
T. Proft & R. Herrmann

349 **Analysis of five tylosin biosynthetic genes from the *tylIBA* region of the *Streptomyces fradiae* genome**
L. A. Merson-Davies & E. Cundliffe

357 **Multiplicity of genes encoding secreted aspartic proteinases in *Candida* species**
M. Monod, G. Togni, B. Hube & D. Sanglard

369 **A copper-transporting P-type ATPase found in the thylakoid membrane of the cyanobacterium *Synechococcus* species PCC7942**
K. Kanamaru, S. Kashiwagi & T. Mizuno

MicroCorrespondence

379 **A conserved surface-exposed domain in major outer membrane proteins of pathogenic *Pseudomonas* and *Branhamella* species shares sequence homology with the calcium-binding repeats of the eukaryotic extracellular matrix protein thrombospondin**
R. De Mot & J. Vanderleyden

VOLUME 13 NUMBER 3

MicroReviews

381 **tRNA-directed transcription antitermination**
T. M. Henkin

389 **Bees aren't the only ones: swarming in Gram-negative bacteria**
R. M. Harshey

395 **The actin-based motility of the facultative intracellular pathogen *Listeria monocytogenes***
P. Cossart & C. Kocks

Research Articles

403 **Sequence changes in the pilus subunit lead to tropism variation of *Neisseria gonorrhoeae* to human tissue**
A.-B. Jonsson, D. Ilver, P. Falk, J. Pepose & S. Normark

417 **Identification of a second oligopeptide transport system in *Bacillus subtilis* and determination of its role in sporulation**
A. Koide & J. A. Hoch

427 **The *rfb* locus from *Pseudomonas aeruginosa* strain PA103 promotes the expression of O antigen by both LPS-rough and LPS-smooth isolates from cystic fibrosis patients**
D. J. Evans, G. B. Pier, M. J. Coyne, Jr & J. B. Goldberg

435 **Transmembrane signal transduction by the *Escherichia coli* osmotic sensor, EnvZ: intermolecular complementation of transmembrane signalling**
S. Tokishita & T. Mizuno

445 **EGTA induces the synthesis in *Escherichia coli* of three proteins that cross-react with calmodulin antibodies**
D. Laoudj, C. L. Andersen, A. Bras, M. Goldberg, A. Jacq & I. B. Holland

459 **The protein HU can displace the LexA repressor from its DNA-binding sites**
O. Preobrajenskaya, A. Boullard, F. Boubrik, M. Schnarr & J. Rouvière-Yaniv

469 **Neither absence nor excess of λ O initiator-digesting ClpXP protease affects λ plasmid or phage replication in *Escherichia coli***
A. Szalewska, G. Węgrzyn & K. Taylor

475 **An analogue of the DnaJ molecular chaperone whose expression is controlled by σ^S during the stationary phase and phosphate starvation in *Escherichia coli***
T. Yamashino, M. Kakeda, C. Ueguchi & T. Mizuno

485 **Analysis of membrane protein interaction: ToxR can dimerize the amino terminus of phage lambda repressor**
M. Dziejman & J. J. Mekalanos

495 **A dominant mutation in the bacteriophage lambda *S* gene causes premature lysis and an absolute defective plating phenotype**
R. Johnson-Boaz, C.-Y. Chang & R. Young

505 **Regulation of xylose utilization in *Bacillus licheniformis*: Xyl repressor–*xyl*–operator interaction studied by DNA modification protection and interference**
A. Scheler & W. Hillen

513 **Identification of a partition region carried by the plasmid D QpH1 of *Coxiella burnetii***
Z. Lin & L. P. Mallavia

525 **Construction and characterization of isogenic O-antigen variants of *Salmonella typhi***
D. M. Hone, A. M. Harris, V. Lim & M. M. Levine

531 **Domain structure and conserved epitopes of Sfb protein, the fibronectin-binding adhesion of *Streptococcus pyogenes***
S. R. Talay, P. Valentin-Weigand, K. N. Timmis & G. S. Chhatwal

541 **Vitamin B_{12} repression of the *cob* operon in *Salmonella typhimurium*: translational control of the *cbiA* gene**
A. A. Richter-Dahlfors, S. Ravnum & D. I. Andersson

VOLUME 13 NUMBER 4

Research Articles

555 **The *Salmonella typhimurium* invasion genes *invF* and *invG* encode homologues of the AraC and PulD family of proteins**
K. Kaniga, J. C. Bossio & J. E. Galán

569 **Location of a lepidopteran specificity region in insecticidal crystal protein CryIIA from *Bacillus thuringiensis***
Y. Liang & D. H. Dean

577 **Nucleoid partitioning in *Escherichia coli* during steady-state growth and upon recovery from chloramphenicol treatment**
J. M. L. M. van Helvoort & C. L. Woldringh

585 **Five *Listeria monocytogenes* genes preferentially expressed in infected mammalian cells: *plcA*, *purH*, *purD*, *pyrE* and an arginine ABC transporter gene, *arpJ***
A. D. Klarsfeld, P. L. Goossens & P. Cossart

599 **Mutational analysis of the arginine repressor of *Escherichia coli***
G. Tian & W. K. Maas

609 **Mutant *Escherichia coli* arginine repressor proteins that fail to bind L-arginine, yet retain the ability to bind their normal DNA-binding sites**
M. Burke, A. F. Merican & D. J. Sherratt

619 **Redundancy of the conserved His residue in *Azotobacter vinelandii* NifL, a histidine autokinase homologue which regulates transcription of nitrogen fixation genes**
P. Woodley & M. Drummond

627 **Partial suppression of an *Escherichia coli* TonB transmembrane domain mutation (ΔV17) by a missense mutation in ExbB**
R. A. Larsen, M. G. Thomas, G. E. Wood & K. Postle

641 **Cloning and primary structure of *Staphylococcus aureus* DNA topoisomerase IV: a primary target of fluoroquinolones**
L. Ferrero, B. Cameron, B. Manse, D. Lagneaux, J. Crouzet, A. Famechon & F. Blanche

655 **Use of digitized video microscopy with a fluorogenic enzyme substrate to demonstrate cell- and compartment-specific gene expression in *Salmonella enteritidis* and *Bacillus subtilis***
P. J. Lewis, C. E. Nwoguh, M. R. Barer, C. R. Harwood & J. Errington

663 **Fluctuations in glycolytic mRNA levels during morphogenesis in *Candida albicans* reflect underlying changes in growth and are not a response to cellular dimorphism**
R. K. Swoboda, G. Bertram, S. Delbrück, J. F. Ernst, N. A. R. Gow, G. W. Gooday & A. J. P. Brown

673 **The fimbrial gene cluster of *Haemophilus influenzae* type b**
S. M. van Ham, L. van Alphen, F. R. Mooi & J. P. M. van Putten

685 **Identification of an HP1 phage protein required for site-specific excision**
D. Esposito & J. J. Scocca

697 **The pigmentation locus of *Yersinia pestis* KIM6+ is flanked by an insertion sequence and includes the structural genes for pesticin sensitivity and HMWP2**
J. D. Fetherston & R. D. Perry

709 **A novel illegitimate recombination event: precise excision and reintegration with the Mu *gem* mutant prophage**
P. Ghelardini, J. C. Liébart, G. Di Zenzo, G. Micheli, R. D'Ari & L. Paolozzi

719 **Transport of haemin across the cytoplasmic membrane through a haemin-specific periplasmic binding-protein-dependent transport system in *Yersinia enterocolitica***
I. Stojiljkovic & K. Hantke

733 **The *nlpD* gene is located in an operon with *rpoS* on the *Escherichia coli* chromosome and encodes a novel lipoprotein with a potential function in cell wall formation**
R. Lange & R. Hengge-Aronis

745 **Galactose-binding site in *Escherichia coli* heat-labile enterotoxin (LT) and cholera toxin (CT)**
E. A. Merritt, T. K. Sixma, K. H. Kalk, B. A. M. van Zanten & W. G. J. Hol

VOLUME 13 NUMBER 5

MicroReviews

755 **The bacterial phosphotransferase system: new frontiers 30 years later**
M. H. Saier, Jr, & J. Reizer

765 **Signal peptides: exquisitely designed transport promoters**
J. W. Izard & D. A. Kendall

Research Articles

775 **Molecular characterization of the *cai* operon necessary for carnitine metabolism in *Escherichia coli***
E. Eichler, F. Bourgis, A. Buchet, H.-P. Kleber & M.-A. Mandrand-Berthelot

787 **Molecular characterization of upstream regulatory sequences controlling the photoinduced expression of the *albino-3* gene of *Neurospora crassa***
A. Carattoli, C. Cogoni, G. Morelli & G. Macino

797 **Residue threonine-149 of the *Salmonella typhimurium* CysB transcription activator: mutations causing constitutive expression of positively regulated genes of the cysteine regulon**
T. E. Colyer & N. M. Kredich

807 **The novel lectin-like protein CHB1 is encoded by a chitin-inducible *Streptomyces olivaceoviridis* gene and binds specifically to crystalline α-chitin of fungi and other organisms**
J. Schnellmann, A. Zeltins, H. Blaak & H. Schrempf

821 **Structural identification of metabolites produced by the NodB and NodC proteins of *Rhizobium leguminosarum***
H. P. Spaink, A. H. M. Wijfjes, K. M. G. M. van der Drift, J. Haverkamp, J. E. Thomas-Oates & B. J. J. Lugtenberg

833 **Threonine dehydratases of *Corynebacterium glutamicum* with altered allosteric control: their generation and biochemical and structural analysis**
B. Möckel, L. Eggeling & H. Sahm

843 **DNA polymerase III of *Mycoplasma pulmonis*: isolation and characterization of the enzyme and its structural gene, *polC***
M. H. Barnes, P. M. Tarantino, Jr, P. Spacciapoli, N. C. Brown, H. Yu & K. Dybvig

855 **Universal barrier to lateral spread of specific genes among microorganisms**
E. Díaz, M. Munthali, V. de Lorenzo & K. N. Timmis

863 **The 100 kDa haem:haemopexin-binding protein of *Haemophilus influenzae*: structure and localization**
L. D. Cope, S. E. Thomas, J. L. Latimer, C. A. Slaughter, U. Muller-Eberhard & E. J. Hansen

875 **A phosphorylated DNA-binding protein is specific for the red-light signal during complementary chromatic adaptation in cyanobacteria**
A. Sobczyk, A. Bely, N. Tandeau de Marsac & J. Houmard

887 **Specific initiation of transcription at a cyanobacterial promoter with RNA polymerase purified from *Calothrix* sp. PCC 7601**
G. Schyns, A. Sobczyk, N. Tandeau de Marsac & J. Houmard

897 **Investigation of the role of the disulphide bond in the activity and structure of staphylococcal enterotoxin C1**
C. J. Hovde, J. C. Marr, M. L. Hoffmann, S. P. Hackett, Y.-I. Chi, K. K. Crum, D. L. Stevens, C. V. Stauffacher & G. A. Bohach

911 **ppGpp concentration, growth without PBP2 activity, and growth-rate control in *Escherichia coli***
D. Joseleau-Petit, D. Thévenet & R. D'Ari

919 **The *opaH* locus of *Neisseria gonorrhoeae* MS11A is involved in epithelial cell invasion**
L. S. Waldbeser, R. S. Ajioka, A. J. Merz, D. Puaoi, L. Lin, M. Thomas & M. So

929 **Structural analysis and molybdenum-dependent expression of the pAO1-encoded nicotine dehydrogenase genes of *Arthrobacter nicotinovorans***
S. Grether-Beck, G. L. Igloi, S. Pust, E. Schilz, K. Decker & R. Brandsch

Erratum

937 **Reversible topology of a bifunctional transmembrane protein depends upon the charge balance around its transmembrane domain**
H. Kim, S. Paul, J. Gennity & M. Inouye

VOLUME 13 NUMBER 6

Research Articles

939 **The role of the pilus in recipient cell recognition during bacterial conjugation mediated by F-like plasmids**
K. G. Anthony, C. Sherburne, R. Sherburne & L. S. Frost

955 **Transfer of the pIJ101 plasmid in *Streptomyces lividans* requires a *cis*-acting function dispensable for chromosomal gene transfer**
G. S. Pettis & S. N. Cohen

965 **Synergism of mosquitocidal toxicity between CytA and CryIVD proteins using inclusions produced from cloned genes of *Bacillus thuringiensis***
D. Wu, J. J. Johnson & B. A. Federici

973 **The *pilE* gene product of *Pseudomonas aeruginosa*, required for pilus biogenesis, shares amino acid sequence identity with the *N*-termini of type 4 prepilin proteins**
M. A. Russell & A. Darzins

987 **Regulation of R100 conjugation requires *traM in cis* to *traJ***
W. B. Dempsey

1001 **Mutants of *Escherichia coli* Trp repressor with changes of conserved, helix-turn-helix residue threonine 81 have altered DNA-binding specificities**
J. Pfau, D. N. Arvidson & P. Youderian

1013 **TcpA pilin sequences and colonization requirements for O1 and O139 *Vibrio cholerae***
J. A. Rhine & R. K. Taylor

1021 **σ^S-dependent growth-phase induction of the *csgBA* promoter in *Escherichia coli* can be achieved *in vivo* by σ^{70} in the absence of the nucleoid-associated protein H-NS**
A. Arnqvist, A. Olsén & S. Normark

1033 **Molecular characterization and transcription of the histone H2B gene from the protozoan parasite *Trypanosoma cruzi***
J. A. García-Salcedo, J. L. Oliver, R. P. Stock & A. González

1045 **Nitrite and nitrate regulation at the promoters of two *Escherichia coli* operons encoding nitrite reductase: identification of common target heptamers for both NarP- and NarL-dependent regulation**
K. L. Tyson, J. A. Cole & S. J. W. Busby

1057 **Gene expression in mycobacteria: transcriptional fusions based on *xylE* and analysis of the promoter region of the response regulator *mtrA* from *Mycobacterium tuberculosis***
R. Curcic, S. Dhandayuthapani & V. Deretic

1065 **Glycopeptide resistance mediated by enterococcal transposon Tn*1546* requires production of VanX for hydrolysis of D-alanyl-D-alanine**
P. E. Reynolds, F. Depardieu, S. Dutka-Malen, M. Arthur & P. Courvalin

1071 **Transcription of the principal sigma-factor genes, *rpoD* and *rpoS*, in *Pseudomonas aeruginosa* is controlled according to the growth phase**
M. Fujita, K. Tanaka, H. Takahashi & A. Amemura

1079 **Characterization of a gene, *pilU*, required for twitching motility but not phage sensitivity in *Pseudomonas aeruginosa***
C. B. Whitchurch & J. S. Mattick

1093 **Anthrax toxin lethal factor contains a zinc metalloprotease consensus sequence which is required for lethal toxin activity**
K. R. Klimpel, N. Arora & S. H. Leppla

1101 **Positive selection for resistance to 2-deoxyglucose gives rise, in *Streptococcus salivarius*, to seven classes of pleiotropic mutants, including *ptsH* and *ptsI* missense mutants**
L. Gauthier, S. Thomas, G. Gagnon, M. Frenette, L. Trahan & C. Vadeboncoeur

1111 **Immunity proteins to pore-forming colicins: structure-function relationships**
D. Espesset, P. Piet, C. Lazdunski & V. Géli

1121 **The colicin A pore-forming domain fused to mitochondrial intermembrane space sorting signals can be functionally inserted into the *Escherichia coli* plasma membrane by a mechanism that bypasses the Tol proteins**
D. Espesset, Y. Corda, K. Cunningham, H. Bénédetti, R. Lloubès, C. Lazdunski & V. Géli

1133 **Decay of the IS*10* antisense RNA by 3′ exoribonucleases: evidence that RNase II stabilizes RNA-OUT against PNPase attack**
C. M. Pepe, S. Masleša-Galić & R. W. Simons
